AMULYA M.G

Mysuru, India | +91 7975840114 | amulyamg73@gmail.com | linkedin.com/amulyamg

EDUCATION

NIE First Grade College, Mysuru
Bachelor of Computer Application (BCA) - Ongoing

Relevant Courses: Python Programming; Data Structures and Algorithms; Database Management Systems; Artificial Intelligence Fundamentals; Machine Learning Principles; Web Application Development; Software Engineering; Data Analytics and Visualization.

TECHNICAL SKILLS

Software/Tools: Visual Studio Code, Jupyter Notebook, Git, GitHub, Microsoft Excel
Programming Languages: Visual Basic, C/C++, JavaScript, Python, SQL

PROJECTS

Accident Road Crash Alert System, Major Project
• Engineered an AI-driven Python system to detect road accidents in real time.
• Implemented data preprocessing and validation pipelines to enhance detection accuracy.

Movie Recommendation System, Minor Project,
• Developed a full-stack Flask web application delivering personalized movie recommendations.
• Designed backend logic to analyze user preferences and generate relevant suggestions.

EXPERIENCE

AI & Machine Learning Intern — Torus Solutions, Mysuru Dec 2025 – Present
• Performed end-to-end data preprocessing including cleaning, transformation, and validation to prepare high-quality datasets for machine learning workflows.
• Built and fine-tuned predictive models using Python to solve real-world business problems.
• Conducted exploratory data analysis (EDA) to uncover patterns and improve feature selection.
• Collaborated with senior engineers to test model performance and enhance accuracy.
• Documented implementation steps and maintained organized project repositories using Git.

TECHNICAL & ACADEMIC ACTIVITIES

Technical Workshops & Coding Events, Mysuru - *Active Participant*
• Attend hands-on sessions and technical webinars focused on Artificial Intelligence, Machine Learning, and data analytics.
Peer Learning Group, NIE First Grade College - *Member*
• Collaborate with classmates to discuss Python programming, database concepts, and real-world problem-solving techniques.
Technical Meetups & Hackathons - *Participant*
• Participate in coding challenges and mini hackathons to strengthen practical development skills.

CORE COMPETENCIES

• Analytical Thinking & Problem Solving
• Data-Driven Decision Making
• Research & Model Documentation
• Agile Learning & Adaptability
• Technical Communication & Team Collaboration
